WHAT I BRING

- Hands-on ownership of live commercial sites — fix, build, test, deploy, and document.
- AI-first engineering — builds and ships complex full-stack systems fast with AI tooling.
- Deep WordPress and WooCommerce, plus full-stack: React, Node, Astro, Strapi, and APIs.
- Diagnoses inherited codebases, hosting, and live production issues under pressure.
- Clear written updates and documentation; explains problems in plain English to anyone.
- Reliable team lead — sprint planning, QA, mentoring, and shipping work live safely.
